

## SUSTAINABLE MANAGEMENT AND KNOWLEDGE OF FOREST RESOURCES

### FORESTRY

- ★ Design, implementation and follow up-monitoring of forest management projects and forest operations
- ★ Quantitative and qualitative knowledge of the forest resource: mapping of the territory; management inventory; logging inventory
- ★ Computation of decision-making parameters for forest sustainable management – Implementation of reduced impact logging

### SOCIO-ECONOMY

- ★ Analysis of the populations socioeconomic situation
- ★ Support for the organization and development of socioeconomic activities
- ★ Actions for integrated and participative forest management

### ECOLOGY

- ★ Forest ecosystems (floral and faunistic) measurements and records
- ★ Delineation of zones and habitats justifying specific protective measures
- ★ Definition of ad hoc specifications aiming at a better protection of the environment and the forest ecosystems
- ★ Timber production certification and legality

FOREST & ENVIRONMENTAL ENGINEERING SERVICES - CONTINUOUS PRESENCE IN THE FIELD IN AFRICA SINCE 1987 - MORE THAN 300 PROJECTS CARRIED OUT IN MORE THAN 50 COUNTRIES - OUR CLIENTS : STATES, PRIVATE COMPANIES, INTERNATIONAL FUNDING ORGANIZATIONS, NGOs - GROUP BASED IN FRANCE - SUBSIDIARIES IN AFRICA & SOUTH AMERICA

## ORGANIZATION, PLANNING & MANAGEMENT

- ★ Planning, programming and organizing forest and industrial activities
- ★ Implementation of data collection, capture and analysis tools on the resources exploitation and management (data base, computerized mapping)
- ★ Improvement of the local operators technical and financial competitiveness through a better use of the resource

## RESEARCH & DEVELOPMENT

- ★ Understanding of the forest regeneration and dynamics at stand level and by species
- ★ Assessment of forest logging impacts
- ★ Study of non-timber forest products
- ★ Study of animal populations justifying specific measures
- ★ Ecological studies of sensitive habitats and environments - Studies of forest stand regeneration

## TRAINING - AWARENESS RAISING

- ★ Forest management training
- ★ Field staff training: felling, skidding, botany, timber product...
- ★ Awareness raising of staff and local populations to sustainable management and protection of the environment

## INSTITUTIONAL STRENGTHENING

- ★ Assistance to governments for the elaboration of forest standards
- ★ Assistance on the elaboration and drafting of forest policies at sub-regional, regional and national levels
- ★ Follow-up and evaluation of the implementation of forestry legislations and regulations
- ★ Training of the staff and State Officials in charge of the supervision and the implementation of forest policies
